MUHAMMAD ABDULLAH ABID

Senior Unreal Engine Developer | Gameplay Programmer

Lahore, Pakistan | +92 322 7548748 | m.abdullahabid97@gmail.com | linkedin.com/in/muhammadabdullahabid

github.com/m-abdullahabid | Portfolio: m-abdullahabid.github.io

PROFESSIONAL SUMMARY

Senior Unreal Engine Developer with 5+ years of professional experience building gameplay systems in C++ and Blueprints across shooters, racing simulators, horror, open-world, animal simulation and mixed-reality projects. Specialized in gameplay mechanics, enemy AI, vehicle and creature controllers, multiplayer replication and UI, as well as pipeline tooling such as runtime patching, PAK/DLC loading and asset validation. Experienced in taking features from prototype to production-ready builds across six studios and freelance engagements.

TECHNICAL SKILLS

Engine & Languages	Unreal Engine 4/5, C++, Blueprints
Gameplay	Gameplay Ability System (GAS), combat systems (FPS, TPS, turn-based), enemy/zombie/boss AI, animal and vehicle controllers, mission systems, inventory, save/load, VFX implementation
Multiplayer	Replication, dedicated servers, network optimization, multi-device synchronization
UI & Input	UMG, controller input and presets, input-aware UI, steering-wheel force feedback (DirectInput)
Tools & Pipeline	Asset validation, runtime patching, PAK/DLC loading, level streaming, editor plugins, version control
Integrations	Wwise, Cesium, MQTT/IoT, Point Cloud Library, REST/HTTP APIs, Meshy API, Pixel Streaming, MR passthrough

PROFESSIONAL EXPERIENCE

Senior Unreal Engine Developer, Cyberzeus Games — **Jul 2026 – Present**

Play Prey – Animal Simulator

- Develop the animal controller for player-controlled creatures.
- Develop animal NPCs that populate the game world.

Unreal Engine Developer, Octal Games Studio *(Freelance)* — **Apr 2026 – Sep 2026**

Death Metal – FPS Shooter

- Developed enemy AI, including ranged shooter AI, zombie AI and boss AI.
- Implemented core gameplay mechanics and a mission system.
- Implemented gameplay VFX.

Unreal Engine Developer, Wanological Solutions — **Nov 2025 – Mar 2026**

Anitu – TPS Turn-Based Game

- Developed the turn-based combat system, including player skill levels and stat upgrades.
- Added controller support for gameplay and UI with control presets; UI screens and icons switch automatically by input device.

UNSDG AI Prompt and Model Generation – Character Design System

- Integrated Meshy Live API and Victron VRM API, handling authentication, Unix timestamps and HTTP workflows for mesh generation and solar (kWh) data retrieval.
- Automated prompt generation from SDG keywords with avatar-based influence logic defining procedural mesh style and structure.
- Converted API meshes to textured FBX for Unreal visualization and resolved response issues affecting Pixel Streaming builds.

Load Limit – Horror Survival

- Developed a single-player horror survival game with AI-driven monster behavior and sound-based stealth mechanics.
- Implemented a risk–reward extraction loop with dynamic stress effects, weight/noise systems and adaptive UI.
- Delivered a polished desktop build with save/load systems, full UI flow and audio integration.

Senior Unreal Engine Developer, Hito Studios **Feb 2025 – Nov 2025**

Vroom Vroom – AAA Racing Simulator

- Developed an F1-style spectator system with driver perspectives and multiple dynamic camera POVs.
- Implemented steering-wheel force feedback using DirectInput, with physics-based calculations for accurate feedback.
- Implemented immersive UI components for a seamless player experience.

Unreal Game Engineer, Invozone **Jun 2023 – Feb 2025**

FPS Multiplayer Shooter

- Developed a multiplayer FPS with varied shooting mechanics, a medical/healing system and an inventory for weapons, ammo and consumables.
- Built and configured a dedicated server and optimized networking and replication for smooth online play.

Mixed Reality Metaverse – Live Theater Show

- Integrated MR passthrough and synchronized 50+ headsets for a theater-wide experience.
- Built a manual dialogue system and an administrative controller to run live shows.

Tire Burners – Stunt Racing Game

- Designed race car controllers with distinct, physics-based handling.
- Developed a track generator mode, multiple race modes and a car selection system.

Digital Twin

- Integrated Cesium for real-world 3D visualization and MQTT for real-time IoT device updates.
- Integrated Point Cloud Library (PCL) to load point clouds at runtime, with an intuitive navigation UI.

Unreal Engine Developer, Dreamcast Interactive **Nov 2022 – Jun 2023**

Pixelmon – Open World

- Implemented a stamina system with the Gameplay Ability System (GAS), including action-based buffs and debuffs.
- Designed modular gameplay abilities that can be added dynamically at runtime.
- Built a runtime patching system and a PAK file loader for DLC and runtime asset streaming.
- Developed an asset validation tool that flags missing files, incorrect references and naming issues.
- Integrated Wwise for interactive and spatialized audio.

Junior Unreal Engine Developer, BigImmersive **Oct 2021 – Nov 2022**

Terra Virtua Metaverse

- Developed a level streaming plugin that loads levels by player location, reducing memory usage and load times.
- Built a screenshot and gallery system with camera effects, and an image upload system that converts images to 2D textures with file-type, size and resolution filters.
- Implemented UI components, including pagination for long lists, in collaboration with multiple departments.
- Created a circular spawn manager for procedural placement and integrated external backend APIs.

Unreal Engine Developer Intern, BigImmersive **Sep 2021 – Oct 2021**

BomberMan 3D

- Developed a five-level top-down action game with an AOE bomb mechanic, enemy AI, level timer, points system and character creation.

EDUCATION

BS Computer Science, University of Central Punjab, Lahore, Pakistan **2016 – 2021**

Intermediate of Science, Punjab College, Faisalabad, Pakistan **2013 – 2015**

CERTIFICATIONS & LANGUAGES

Certification: Coding in C++, Aptech Technologies, Faisalabad, Pakistan

Languages: English, Urdu
